

Intelligent Readers will notice that

# Tutt's Pills

are not "warranted to cure" all classes of diseases, but only such as result from a disordered liver, viz:

Vertigo, Headache, Dyspepsia, Fevers, Costiveness, Bilious Colic, Flatulence, etc.

For these they are not warranted infallible, but are as nearly so as it is possible to make a remedy. Price, 25cts. SOLD EVERYWHERE.

## FROM WATAUGA.

October 31.

J. B. Hess and family are moving to your city.

Mrs. W. M. Jobling returned last Friday night from Chicago.

Robertson & Garner lost a work-mule on the night of the 26th.

Neal Croy, son of Rev. Z. J. Croy, died yesterday of typhoid fever.

L. B. Moulton, manager of the tannery, has returned from Boston.

C. F. Camp and wife came up last night on No. 2, to a visit to friends.

A little child of Mark and Mary Fidefee died yesterday of bronchitis.

John Anderson, the bridge contractor, of Morristown, is here on business.

J. C. Robertson and R. W. Smalling returned Saturday night from Chicago.

J. M. Maher, of Sharon, Pa., and M. A. Watton, of Toronto, Ontario, were here Monday.

Prices always a little lower than any where else at the Bee Hive try them on shoes.

David Ostreicher, of Richmond, Va., was here Saturday representing M. Rosenbaum & Co.

French Barnes, the photographer of Elizabethton, came here last night on a visit to home folks.

John Archer and son and two horses were drowned at Hall's Ford on the Watauga last Monday.

Mrs. Alice Welch went up to Bristol to remain several weeks, and to attend the wedding of Miss McDowell.

The wife and children of H. A. Park, manager at the saw mill, are expected here to-day from St. Albans, W. Va.

Our old citizen, J. B. Hess, contemplates moving to your city in a few weeks, and M. S. Bennett will occupy his premises.

Englebert Sanner arrived here on the 25th from Norton, Va., on a visit to relations. He is developing coal mines near Norton.

Prof. John Charvon, the Malay, who was to have lectured here last night, was detained in Abingdon, and will lecture here next Tuesday night.

Marcus A. Davis, age 76 years, a native of Wilmington, N. C., but who has been in Turkeytown for many years, died at 12:20 a. m. Oct. 26, and was buried in the Mottern Cemetery on the 27th.

H. C. Easington, of Philadelphia, W. E. Merriman, of Williamsport, Pa., and Daniel Crane, of Boston, extensive lumber dealers, were here last week investigating the lumber interests of this section.

## Guaranteed Cure.

We authorize our advertised druggist to sell Dr. King's New Discovery for consumption, coughs and colds, upon this condition. If you are afflicted with a cough, cold or any lung, throat or chest trouble, and will use this remedy as directed, giving it a fair trial, and experience no benefits, you may return the bottle and have your money refunded. We could not make this offer did we not know that Dr. King's New Discovery could be relied on. It never disappoints. Trial bottles free at McFarland & Co's. Drug Store. Large size 50 cents and \$1.00.

After a conference with the President and the Secretary of State yesterday, Secretary Herbert issued an order removing Commodore and Acting Rear Admiral Stanton from command of the American squadron at Rio Janeiro for saluting Mello's flag. Captain Picking, the next officer in rank, was placed in command.

## MILKING JERSEYS.

PRIZE ESSAY, BY D. W. VOYLES.

Thorough milking, performed in the light of full information in regard to the anatomical construction of the udder and the chemical constituents of the milk, is an act of the greatest importance to the owners of Jersey cattle.

The art of milking consists in the removal of all the milk in the udder at the time of the act in the gentlest possible manner, and by rapid process, slow milking being always bad milking.

When being milked the cow should be in a condition of absolute quietude; if excited by the act of stabling, she should be allowed time to quiet down.

No condition is so favorable to the milking process as that feeling of satiety following a full feed. The udder should be thoroughly cleansed and the teat first chosen gently squeezed on its tip end in order to overcome the contraction of the sphincter muscle and thus facilitate the flow, after which the milk should be drawn as rapidly as possible. There is a feeling of relief when a distended udder is being emptied, to which a cow responds, and to which she will continue her consent to the end of the act, if it be not too long delayed, that is not only of valuable assistance in the process, but without which it can not be perfectly complete.

The first teat selected should be milked perfectly clean before passing to another, and so on until all are emptied, by which time the first teat milked will be partly refilled by the "second flow," when the second round should be made in the same order as the first; but in adopting this system of milking, the same teat should not be chosen at every milking for the beginning, because the first quarter of the udder emptied has the assistance of the compression made by the three remaining distended quarters, and the last one milked has no assistance from this source; if, therefore, the same teats be always selected in the same order, the teat first milked would develop that quarter of the udder to increased capacity, while the last quarter emptied or partly emptied would correspondingly diminish in capacity. This fact can be taken ad-

come early strippers and valueless animals.

Cows having fat udders usually belong to this class, and require the exercise of a great deal of patience and skill in their management in order to preserve their usefulness. In the hands of a careless and unskillful milker they soon become of little practical dairy value.

When the fault of hard milking is due to a small opening in the terminal end of the teat, the remedy is artificial distension; but with a correspondingly small opening above, no operation can remedy, since if the teat be emptied easily and rapidly the udder above can not respond through a small pouch opening in refilling the teat, but will continue to give down the milk in a dribbling manner.

Cows that are imperfectly milked from whatever cause, either careless or imperfect milking from the fault of the milker, or from the difficult task by reason of the anatomical construction of the udder as herein described, soon degenerate into worthless animals. The milk that remains in the udder from imperfect milking is that which is held by the small pouches or milk-vesicles high up in the bag, and will form a curd which will excite inflammation and destroy the secreting function of its mucous lining, or cause the adhesive and complete closure of the cavity or pouch.

It is the experience of every dairy of twenty-five or more cows milked promiscuously by three or four milkers, that a contest is always waged for the privilege of milking "old Rose," because she milks easy, and a shunning disposition displayed by all in reference to eight or ten others that no one cares to milk. To be able to milk the hard ones with patience and skill is the qualification that should and must be attained by a successful dairyman.

## Cure for Headache.

As a remedy for all forms of Headache Electric Bitters has proved to be the very best. It effects a permanent cure and the most dreaded habitual sick headache yield to its influence. We urge all who are afflicted to procure a bottle, and give this remedy a fair trial. In case of habitual constipation Electric Bitters cures by giving the needed tone to the bowels, and few cases long resist the use of this medicine. Try it once. Large bottles only Fifty cents at McFarland and Co.

## Cream-not Skim--Milk.

Every farmer and villager, their wives and boys and girls, will be interested in the big-little, cream-not-skim-milk paper, the FARM JOURNAL, of Philadelphia. Its 200,000 subscribers are scattered from Maine to Washington, and from Michigan to Texas. It's breezy, crisp, boiled-down pages contain as much information in the course of the year as many of the high-priced weeklies; while its earnest, manly tone and its bright and common-sense way of treating farm matters leaves a good and lasting taste in one's mouth. The subscription price is 50 cents a year. We have made arrangements with the publisher by which he will send in one full year free, to all who promptly pay up for our paper. Sample copies will be sent free by addressing a postal request to FARM JOURNAL, Philadelphia, Pa. 484-11.

## In the Early Days

of cod-liver oil its use was limited to easing those far advanced in consumption. Science soon discovered in it the prevention and cure of consumption.

## Scott's Emulsion

of cod-liver oil with Hypophosphites of lime and soda has rendered the oil more effective, easy of digestion and pleasant to the taste.

Prepared by Scott & Bowne, N. Y. All druggists.

vantage of in the development of deficient quarters by always emptying them first until the udder is balanced by their restoration.

Whether, in the act of milking, the teat shall be caught high up or compression made from its middle or lower half only, will depend upon the nature and construction of the udder and teats in each respective case. If the teats are of good size and have good openings leading both into them and out, the cow can be milked easily and rapidly by either plan; but in the case of a cow that has a small opening leading from the large milk-pouch into the teat, whether the teat be large or small, and whether its terminal opening be large or small, the udder can not be emptied by drawing on the teats alone, but compression must be made high up, and include enough of the adjacent udder to force the milk out of the lower and large milk-pouch into the teat. This act is performed at the risk of producing varicose veins at the base of the teat that will eventually develop into chronic garget, but not to perform it on this unsatisfactory class of cows is to allow them to retain so much of their milk as to be-

DR. DROMGOOLE'S ENGLISH Female Bitters  
Cures all Female Complaints and Monthly Irregularity, Leucorrhoea or Whites, Pain in Back or Sides, strengthens the feeble, builds up the whole system. It has cured thousands and will cure you. Druggists have it. Send stamp for book.
